ABOUT

The piece

Introducing the Asteroid floor lamp, a truly unique and special piece that we've poured our hearts and souls into. This one-of-a-kind creation represents our interpretation of the concept of "functional art", blending form and function in a way that is both striking and practical.

Crafted over the course of 80 hours, this totem floor lamp is the culmination of our passion for design and artistry. Each element is hand-built in stoneware clay in our studio and stacked on a mild steel base and pipe.

LEAD TIME	6 to 8 weeks
CUSTOMISATION	Size, finish and colour on request

TECHNICAL DETAILS

Specification

DIMENSIONS	Dia. 18″ × H. 64″ · Base dia. 12″ Dia. 457 mm × H. 1626 mm · Base dia. 305 mm
WEIGHT	50 kg
MATERIALS	Hand-built clay (stoneware) Mild steel base and pipe
LIGHT SOURCE	1 light source, included with the piece G95 LED globe bulb, 7W, opal glass (E27 holder)
COLOUR TEMPERATURE	3000K, warm white
DIMMING	Non-dimmable as standard, dimmable on request
VOLTAGE	220-240V, 50Hz (India) Other countries on request
CORD	1.5 m black sleeved cord 2-pin plug · No switch

LIVING WITH IT

Care

- Every piece is hand-built, so no two are alike. The details of each one are its own.
- Clean with a soft, dry or damp cloth. Water is fine on the clay, but keep it away from the bulb, holder, cord and all electrical parts.
- Do not use chemicals, or any abrasive cleaner, on the clay.
- Clay can chip if knocked. Lift the lamp from its base, never by the shade or the clay elements, and handle with care. At 50 kg, it needs two or more people to move.

QUESTIONS

Frequently asked

01 LIGHT SOURCE AND DIMMING

The lamp comes with a G95 LED globe bulb (7W, 3000K) in an E27 holder, included with the piece. No external LED driver is needed.

As standard, the lamp is not dimmable. If you would like it dimmable, please tell us when you order. We then fit a dimmable G9 LED bulb inside a 4″ glass globe in place of the G95. It looks just the same, and still needs no external driver.

Automation is also possible if needed. Tell us what you would like it to work with, and we will arrange it.

- Do not use halogen or incandescent bulbs.

02 VOLTAGE AND FREQUENCY

In India, the lamp is wired for 220-240V / 50Hz.

If you need it for another country, we can arrange the voltage and frequency it requires.

03 PLUGS AND INSTALLATION

We supply the plug to suit the country the lamp is going to, so please let us know where it will be placed.

The lamp is freestanding and stands on a flat, level floor. It is assembled in parts: the base plate, then the pipe, each clay element stacked in turn, the shade, and finally the bulb in its holder. An installation guide is provided with the piece.

04 BATHROOMS AND OUTDOORS

As standard, the lamp is made for indoor use. Clay itself is an outdoor material, so if you would like to place it somewhere damp, in a bathroom or a partly covered outdoor space, let us know.

For these spaces, we make the lamp's structure (the pipe, the base plate and the other mild steel parts) in stainless steel instead, and fit water-resistant light sources in place of the indoor ones we use as standard.

05 HANDMADE PIECES

Every piece is hand-built in our studio, so each one is different. The details, surface, finish and colour of your lamp will be its own.

Our images are shot in a professional setting with professional lighting, so the finish, and especially the colour, may look different in person than in the images.

06 SHIPPING, TAXES AND INSTALLATION

Packaging and shipping are charged separately, and quoted based on your delivery address. GST at 18% is applicable.

If you would like the piece installed, our team can travel from Mumbai to your delivery address and install it for you, at an additional cost.

Every piece is made to order in our studio in India.
Write to us about sizes, finishes or colour customisation.
